Full job description

We are looking for skilled Mechanical fitters to fit and assemble metal parts to fabricate production machines and other equipment (This position is full time permanent working 38hours a week)

Skilled Mechanical fitters use a range of tools and engineering techniques to maintain and repair mechanical plant machinery and equipment to operational standards. They test and identify defective or worn mechanical components or equipment. Mechanical fitters also use precision measuring instruments to check parts for accuracy and fit.

They work with the maintenance team during the start of day and end of day program assembling and disassembling the plant machinery for cleaning etc.

They also do regular weekend work as there is a preventative defect program that services the plant to ensure it runs smoothly this is done every weekend but not expected to attend each weekend
