pushed too hard. They prefer to work in a way that is well-planned, using foresight and planning to ensure that people don't get to a point where they feel stressed or burnt out.

The Role:

The position covers all aspects of Business Services. In addition to compliance duties such as preparation of tax returns and financial statements; payroll; and bookkeeping there will also be a healthy dose of advisory tasks your clients need taken care of such as management consulting, cashflow forecasting, benchmarking, strategic planning, business start-up, estate planning, and tax advice.

Progression:

Previously, the Partners took the lion's share of responsibility for clients and the more challenging work. They have now gone away from this, to a more hierarchical structure where they have developed their Managers and senior staff to take the client pressures away from them. This allows the Partners more time to train & develop staff.

The added benefit to this is that there is plenty of room to progress within the firm to Supervisor, Manager and beyond – all whilst being more supported by the Partners.

Seeking 3 + years Business Services experience within professional practice.

With 18years experience recruiting in the Accounting Sector, I can guarantee that your application is in good hands.

The market is small and confidentiality is key. Please feel free to contact me with any questions or concerns you may have or to discuss the options available in the market.
